CI/CD

Benefits and outcomes

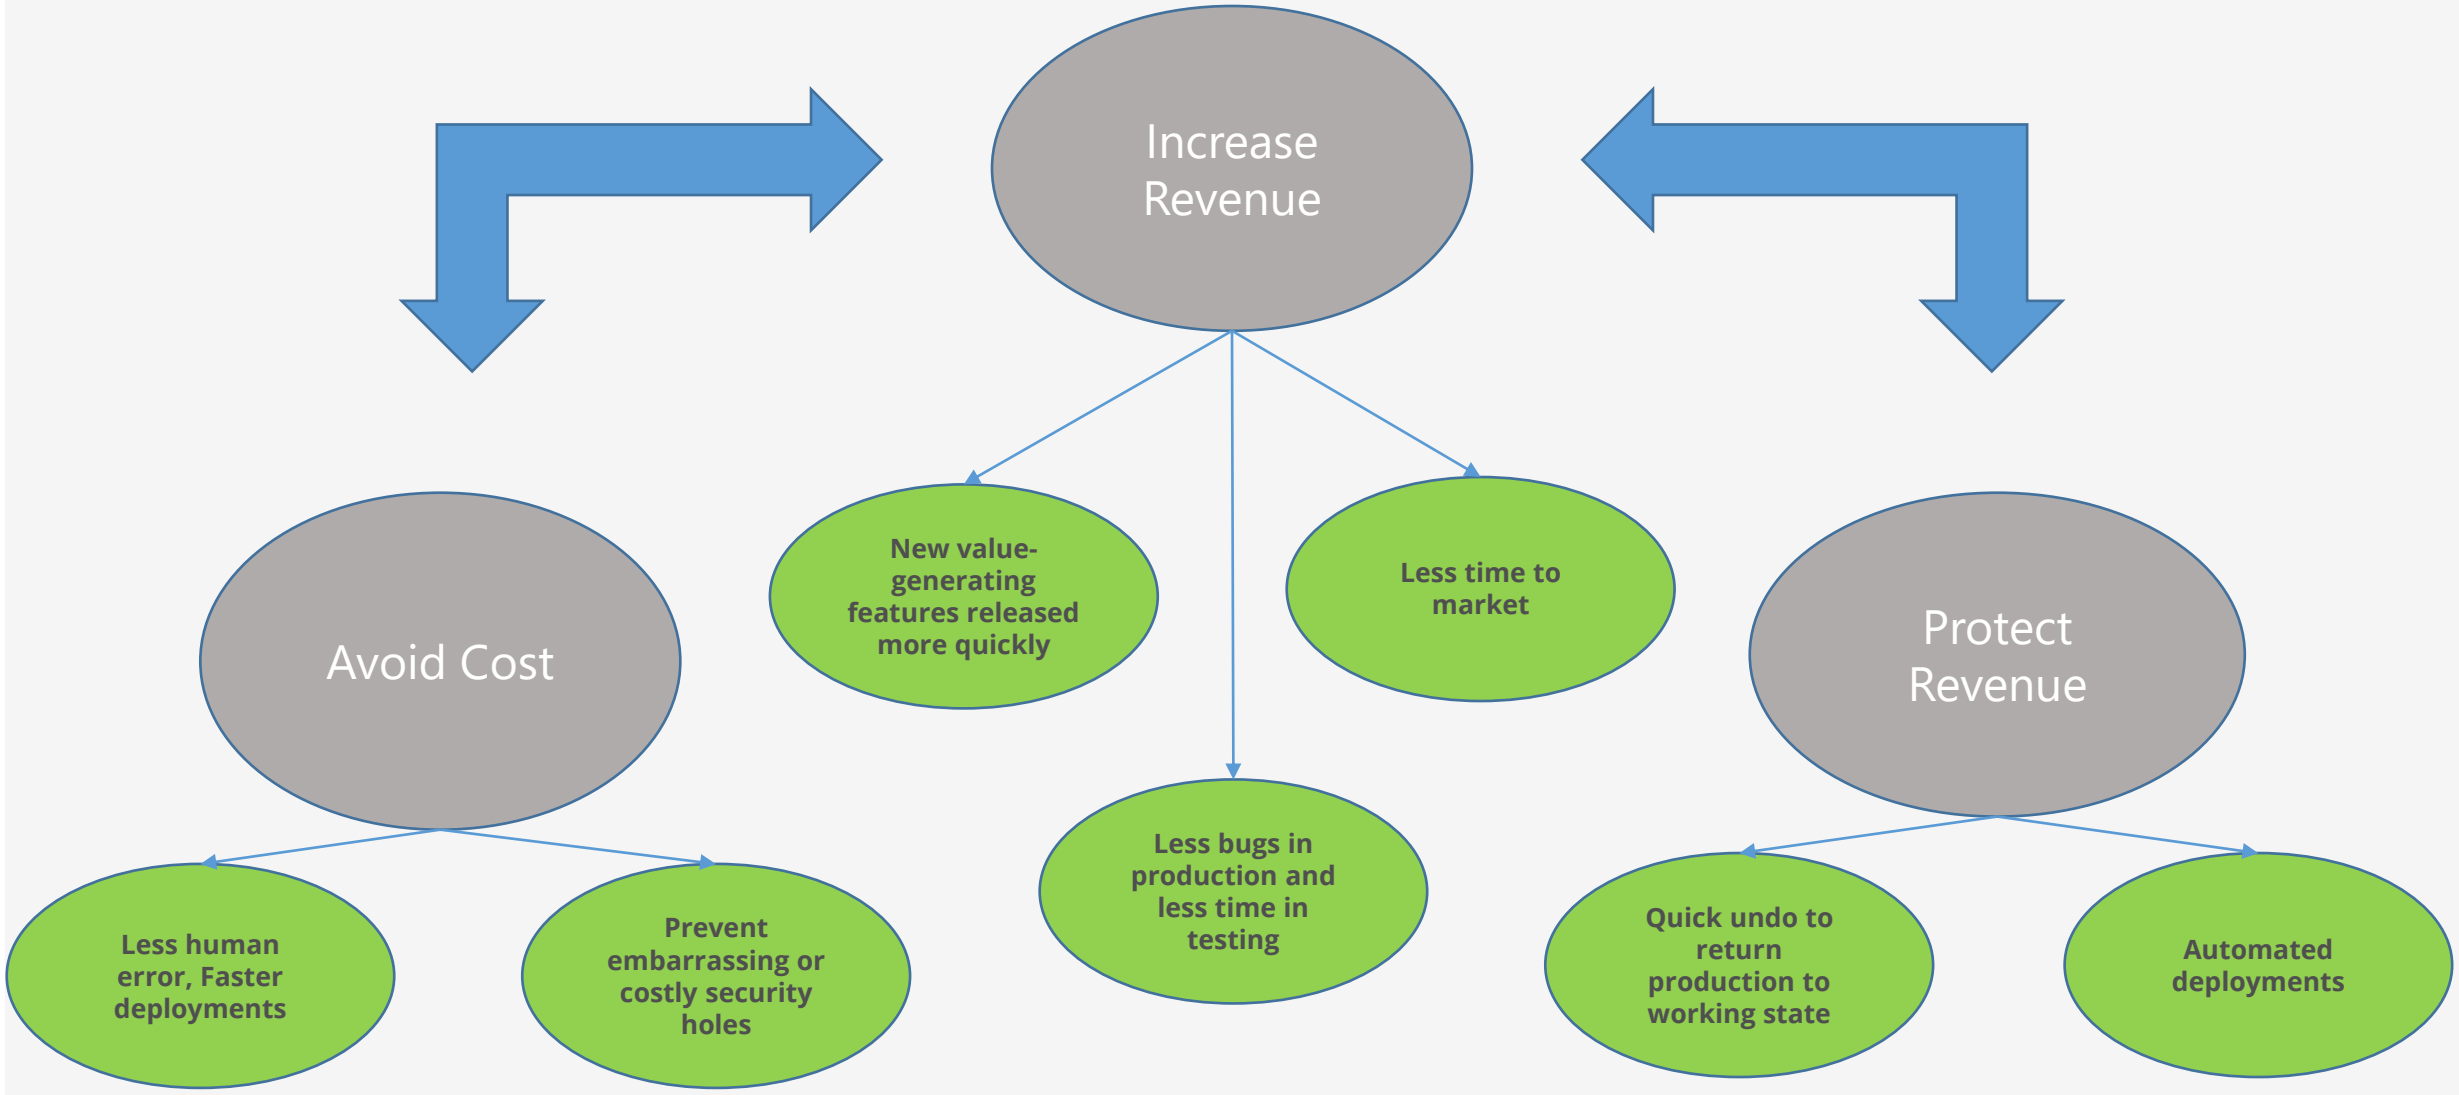
Intro CI/CD

Stakeholders need confidence that:

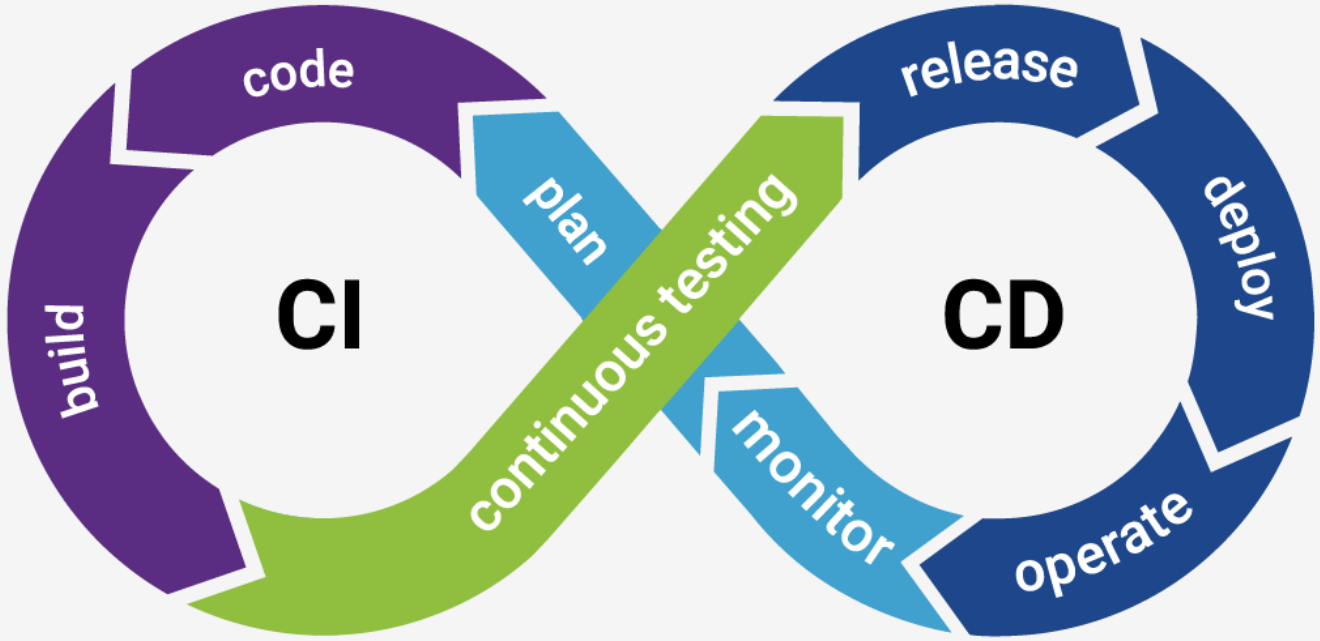
- Production will be available for users
- Features will be built correctly

So, to achieve that mindset and acquire stakeholders' satisfaction we need a convenient way to elaborate and give our revenue a push upwards using continuous integrations and continuous deployments.

CI/CD Benefits



CI/CD GOALS

Using CI/CD will faster the release rate as automated deployment will make it much easier and faster to depend on rather than leaning on human deployment after an extended period, which would increase the delivery and increase productivity and reduce the cost of maintenance.


Using a continuous pipeline will Using CI/CD will faster the release rate as automated deployment will make it much easier and faster to depend on rather than leaning on human deployment after an extended period, which would increase the delivery and increase productivity and reduce the cost of maintenance.
